

## **AMENDMENTS TO THE SPECIFICATION**

**Please amend the paragraph beginning on page 1, line 10 as follows:**

Technical FiledField

The present invention relates to an ~~apparatuses~~ apparatus and a method of processing electronic mail (e-mail) by video or audio data, and more particularly to reproduction technologies of a reply mail citing video or audio data of the original.

**Please amend the paragraph beginning on page 1, line 22 as follows:**

Disclosure of Invention

(Problems to be solved by the invention)

In the system proposed in patent document 1, the receiver of the reply mail must reproduce the video or audio data ~~once created by the own self which is data~~, cited in the reply mail, when reviewing the video or audio data sent from the ~~partner~~ sender in reproduction of the reply mail, mail; ~~and it takes much time in reproduction~~ the reproduction is time-consuming. In particular, since the receiver of the reply mail knows the content of the cited video or audio data ~~once created by the own self~~, and new information is not obtained if the cited data is reproduced precisely, ~~and it is a mere waste of time~~. From such viewpoint, regarding the reply mail citing the video mail or audio mail, the reviewing efficiency thereof is poor for the user.
